American Railroad Journal.

HARLAN A. PIERCE, Editor.

New York, Saturday, September 20, 1879.

The Future Policy of the American Railroad Journal.

Having been reorganized, with this issue, the AMERICAN RAILROAD JOURNAL changes its policy and enters a broader field of journalism to meet the requirements of the times incident to the rapid growth and overshadowing influence of the railroad system of the age, having now fulfilled the object for which it was founded in the second year of the history of railroads, namely: to aid and encourage in its infancy the growth and development of a power which now threatens to become greater than the sources from which it was derived. The JOURNAL will, nevertheless, retain all the excellent features which have made it a power and authority for nearly half a century, both in the United States and abroad, to which a large number of the railroads of this country have had frequent occasion in their early struggles to appeal for aid, when the public lacked faith in their success. As railroads have passed out of that experimental stage of their history into one of command of the capital and capitalists of the country, thus completely changing their relations to the investing public, the present change in the policy of the JOURNAL becomes a necessity. It will, therefore, hereafter take the place to which it is entitled by its age, reputation and services to the railroads and the investing public, of pioneer in independent American railroad journalism, as it has been their pioneer advocate for nearly fifty years. Its editorial department will be made a prominent feature of the JOURNAL, and will be characterized by free and impartial discussions of the questions at issue between the railroads and the public, the railroads and their employes, as well as the financial condition and the general management thereof.

Its news department will maintain its reputation for accuracy as to the facts published, while it will be inspired with new enterprise in the gathering of information of interest to the managers and employes of the roads, to the financial public who invest or speculate in their securities, and to the mercantile and agricultural communities dependent upon railroads for their prosperity. In pursuing this policy, the conductors of the JOURNAL hope to add the young blood and enterprise of the country, to the age, wealth and conservatism now represented in its list of patrons, which is composed largely of the oldest and heaviest financial houses in the United States, Great Britain and the Continent, and of railroad companies, manufacturing establishments, banking and commercial houses in this country.

While the JOURNAL will still be pre-eminently a RAILROAD JOURNAL, as its well-earned and well-known name deserves, it will embrace all the more important branches of Commerce, Manufacture and Agriculture, for which railroads were built, and upon the prosperity of which that of the roads is as dependent as these interests are upon them. It will be the purpose of the JOURNAL to harmonize these mutual interests by mutual concessions and protection, instead of antagonizing them, as is the present policy of the Press and of the parties in interest. All questions arising between Labor and Capital will be treated upon the same basis of mutual interest and concession, believing that no class, or interest, or individual can over-reach or deprive another of its rights without in the end over-reaching itself, and being deprived of its rights in turn. Upon the questions of transportation now at issue between the people or the States and the railroads, it will urge the aggrieved parties and the managers of the roads to meet on a ground of compromise that shall secure each their rights, and to settle their disputes themselves, before politicians shall take them out of the hands of both, and control the roads in the interests of a Ring of demagogues, speculators and contractors, as was the Erie Canal.

In carrying out its policy the JOURNAL will of necessity be aggressive, but it will endeavor to be just and impartial, and to command even greater respect than accorded to its more conservative past. If compelled to attack it will be because the attacked is attacking the rights of others, which principle will lead it to oppose all Trades Unions or combinations of labor, as it will oppose all combinations of capital. Thus will the JOURNAL endeavor to add to the reputation it has so long enjoyed under its late management, as well as under its joint control with Mr. H. V. POOR, so well known as a railroad authority, having graduated from the JOURNAL after thirteen years' editorship thereof.

It will be fifty years in October since the first railroad was built. In 1830 there were only 28 miles of railroad in the United States, and 95 miles in the following year when the JOURNAL was established. Four years later

the great authority on European railroads, Herapath's *Railway and Commercial Journal*, was established in London. From these facts it will be seen that the AMERICAN RAILROAD JOURNAL is the oldest in the world, and has grown up with the railroads of the country, a complete history of which is found in its dusty files running back nearly fifty years. In making our bow to the public we have a temporary indulgence to ask for our tables, which have been somewhat neglected during the past year, as they will be revised and corrected immediately and brought down to the latest dates obtainable.

Boston, Concord and Montreal Railroad.

The earnings of this road for the years ending March 31, 1878 and 1879, were as follows:

	1878.	1879.
From passengers	$257,465 42	$243,451 96
" freight	367,270 42	315,734 46
" mails	16,322 38	16,628 25
" express	9,000 00	9,000 00
" miscellaneous	4,213 98	5,735 82
	$654,272 20	$590,550 49
Expenditures, viz:		
Maintenance of way	$129 253 03	$103,730 83
" motive power	78,896 03	49,237 91
Cost of working road	204,356 98	195,429 62
" management	16,689 97	18,267 74
Miscellaneous	23,972 83	22,265 78
	$453,171 84	$388,931 88
Net income	$201,100 36	$201,618 61
Bonds and cash on hand per last report		231,058 02
Interest received during the year		8,280 02
Oil on hand less than last year		312 68
For sales of consolidated mortgage bonds		243,000 00
Total		$684,269 33
Appropriated as follows:		
Paid coupons, back coupons, interest on over due bonds, etc		$172,609 98
Paid preferred stock dividends		45,246 00
Wood on hand more than last year		1,212 58
Engineer's department, shop stock, etc., on hand more than last year		6,522 88
Mortgage bonds taken up		50,300 00
Convertible Mortgage bonds taken up		192,700 00
In hands of General Manager over last year		22,216 58
Cash and bonds on hand		193,461 36
Total, as above		$684,269 33

Compared with the previous year the gross earnings show a decrease of $63,721 91, with a decrease in expenses of $64,239 96—making the increase in net earnings $518 05. The report says:

The falling off on gross receipts has been largely on freight and on account of the continued depressed condition of business, which we hope will be more favorable the coming year.

Our rolling stock is now in first class condition; we have built new, the past year, one drovers' saloon, two live stock cars, four box and iron flat cars, and made general repairs to the cars and engines. The roadway has been generally improved, and upwards of 60,000 yards of ballasting has been put on during the past year where it seemed to be most needed. We have laid 73,899 sleepers, 200 tons of steel and 500 tons of iron rails, and used 3,000 Fisher & Norris improved joints; and have taken up, and mended, and returned to track 1,318 tons of rails; have built a new water station at Lisbon, and a new freight depot at Tilton, and have kept bridges, buildings, and fences in good condition.

Our arrangements with connecting roads are all of a friendly character, and the provisions of the contracts which had been entered into with them before the commencement of the year have been satisfactorily carried out.

No new contracts have been completed, but a temporary arrangement has been made with the Burlington and Lamoille Valley Railroad in connection with the Portland and Ogdensburg Railroad for a new line for the transportation of freight and passengers from Burlington, by way of the Montpelier and Wells River Railroad, to Woodsville, and then over our road by way Fabyan's and the Portland and Ogdensburg Railroad to Portland; this line, if it shall be found profitable as it now seems probable that it will be, can be made permanent for a term of years.

The road has disposed of the consolidated bonds to the amount of $243,000, which have been applied to take up a portion of the overdue bonds of 1865 and 1875.

Of the sinking fund bonds there are now outstanding but $202,000, on which interest is paid, the company holding $116,000, and the trustees of the fund $306,000. Of the outstanding bonds of 1865 and 1875, as appears in the trial balance, the road has paid for and is carrying $147,500, leaving a balance of $34,700 to redeem.

It would have been a source of gratification to the directors to have been able to have brought the proposed consolidation of the different classes of stock to a conclusion during the year; but it was found that in consequence of the continued depression of business and the diminished receipts, that it would have been impossible to have paid a dividend on the consolidated stock at the rate upon which the basis of consolidation had been proposed, and the directors feel reluctantly compelled to ask the stockholders to still further delay the accomplishment of a result so desirable for the stockholders and so important for the interests of the road; the more favorable indications of the business for the next year, and in the future, lead them to believe that this result need be delayed but a short time longer.

The same reasons that have interfered to delay the proposed consolidation of stock have also operated to prevent the commencement of the extension of the road beyond Groveton towards Colebrook; the directors believe that this delay will be but temporary, and that the interests of the stockholders will be subserved and the convenience of the public promoted by an effort to construct this portion of the chartered route of the road as soon as the increase of business and the relief from the present depression will justify the necessary expenditures.

The equipment of the road consists of 30 locomotives, 25 passenger cars, 2 drawing room cars, 16 mail and baggage cars, and 572 freight cars.

Miles run by passenger trains, 355,682; by freight trains, 338,196; by other trains, 11,152—total miles run, 705,030.

The total number of passengers carried during the year was 203,715—equal to 6,959,519 carried one mile. Total number of tons of freight, 124,331—equal to 7,459,900 tons carried one mile.

TRIAL BALANCE SHEET, March 31, 1879.

Construction		$2,850,000 00
Wood, oil, etc., on hand		59,663 59
Stock, etc., on hand for repairs		103,741 53
Trustees of Sinking Fund		201,500 00
Pemigewasset House		16,000 00
Joseph A. Dodge, General Manager		29,226 00
Purchase of White Mts., N. H., R. R.		300,000 00
Extension of " " "		790,000 00
Branch Railroad to Mt. Washington		379,000 00
Cash on hand for coupons unpaid		1,162 50
Cash on hand for dividends unpaid		11,744 89
Cash and bonds on hand		180,553 97
		$4,922,592 48

President.—J. THOS. VOSE.

Directors.—J. Thos. Vose, Joseph P. Pitman, Peter Butler, S. N. Bell, Joseph A. Dodge, John P. Spaulding, Warren F. Daniell.

Treasurer.—EDWARD D. HARLOW.

General Manager.—JOSEPH A. DODGE.

Our Crops and Railroad Prospects for 1879-'80.

The season is now sufficiently advanced to place our crops beyond the danger of damage by frost, and to enable an approximate estimate to be made of their extent, sufficiently correct for practical purposes, which will show what our railroads have to do for the coming year, as compared with the crop year now closing.

The Winter Wheat crop has been harvested and threshed and found to fully equal the enormous harvest of last year if not to exceed its aggregate of 200,000,000 bushels. The Spring Wheat crop is also harvested and threshing has commenced, from which conflicting reports and estimates are made to suit the "crop correspondents" preconceived opinions and estimates made weeks before the crop had matured, and to aid the bull clique in old Spring Wheat in unloading several million bushels carried into new crop. Throwing aside all these estimates, as well as the associated Press reports, which could not have been more in the interest of said clique had it been controlled thereby, we take the Chicago *Commercial Bulletin's* returns, carefully obtained from its correspondents in every locality of the great grain growing sections, as the most reliable yet given of the Spring Wheat crop not only, but also of the corn and oat crop which it has just published. From these it makes the aggregate yield of Spring Wheat a little less than 140 million bushels in the seven Northwestern States and Territories, or 30 million bushels more than last year, of which 13 millions from new land.

These returns from the same seven Northwestern States, Illinois, Iowa, Kansas, Nebraska, Missouri, Minnesota and Wisconsin, show an increase in the Corn crop of this year over last of 164 million bushels. As these States raised about one-half the crop of 1878, it is safe to estimate 150 million increase for the balance of the United States, allowing 14 million bushels for excess of increased average in those seven States over the other states and territories. This will give us a crop for 1879 of 1,700,000,000 bushels against 1,388,000,000 for 1878 or an increase of 314 million bushels. From the same returns the oat crop is estimated at about the same as last year with possibly a slight deficit. The yield for 1878 was 414 million bushels which was a very large crop

as shown by the prices going as low as 25 cents per bushel. Without careful estimates of the Barley and Rye crop we may safely place them at fully last year's figures with the probability of an excess.

The Cotton crop of last year was over five million bales. Without reliable data for estimating this crop, the Agricultural Bureau reports indicate less this year; but a large class of well informed dealers claim that the Mississippi Valley will make up the deficit in other returns, so that we may safely estimate no material change from a five million bale crop which is also a large crop. These crops are already moving rapidly to the seaboard and into export, especially Wheat, of which the movement in Winter for the last two months is unprecedented in the history of the country.

The Packing Season for provisions commences October 1st for beef products, and November 1st for hog products, when the movement in these great staples of export will actively begin. As to the sources of supply the Agricultural department reports give 31 million head of cattle in the United States in 1878 or an increase of 3 million head in two years; but well informed statisticians place the number in the United States to-day at 35 million head, showing a material increase over last year. Since the shipment of live cattle to Europe began two years ago the movement of live stock has been heavier than formerly in the summer months. During the packing season, or cold weather, shipments of live cattle decrease, but the movement of beef products then begins; and, added to the live stock movement for home consumption, gives an important increase of freight over the summer months. The packing of hogs for last Winter was beyond all precedent, aggregating over six million in the West alone during four months from November 1st. Since then the summer packing has been nearly 2¾ million hogs, with prospect of three million by November 1st, making nearly 10 million packed in the West alone for the current year. The latest official returns report between two and three million more hogs in the country than same date a year ago, or about 32 million head. On the supply for next season the Cincinnati Price Current, the great authority on this subject, gives the opinion that it is safe to count on an increase rather than a decrease even over the enormous figures of last year.

The tobacco crop is also in excess of last year, and indeed every crop of importance in the country except hay, which however is mostly consumed at home and would not effect railroad traffic materially. Thus it will be seen that we have an excess of almost every staple of export grown in the United States.

On the other hand the crops of Europe show a much larger and more general deficit than last year as a whole, increasing the requirements from abroad, which increase can only come from the United States. As the crop of California is either less than last year or held back by the farmers and speculators for higher prices, the chief source of supply is from the Atlantic seaboard. All this enormous surplus of crops will therefore be wanted in Europe, and the bulk of it must pass over the railroads. It does not need the eye of a prophet, therefore, to see that the most prosperous year in the last decade is the one on which the railroads of the United States are now entering.

The trouble has been since 1873 that there was only about two-thirds as much for the roads to do as there was capacity for doing. Now all are taxed beyond their ability and are increasing it as fast as the manufacturing facilities of the country can turn out new engines, new cars and new equipment. The coal roads are the only exception to this condition of affairs, and even they are carrying a largely increased tonnage of coal for manufacturers; but their trouble is that they own the mines and are not getting remunerative prices for their coal. Were they simply carriers and not miners of coal, they would be in greatly improved condition with the reviving of iron industries.

Status of the "C., C. & I. C." Bonds under the Recent Decision of Judge Harlan.

As so much confusion seems to exist on the part of holders of bonds of the "C., C. & I. C." road, as to their status under the recent decision of Judge Harlan, we herewith give, at the request of many of these holders, the effect of that decision upon the different classes of these bonds, as follows: the original underlying or sectional bonds are in no way affected except as they may be enhanced in value by their purchase by the trustees, in pursuance of the requirements of the decision, that the bonded debt should be reduced to $15,821,000, as most of these bonds are at a discount, notwithstanding they are all prior liens to the First Consolidated Mortgage, and many of them original First Mortgage bonds, $1,000,000 of which will mature in 1882 and 1883.

The amount of these is about $7,000,000, on about $5,750,000 of which interest has been regularly paid to date, leaving $1,250,000 on most of which the interest is in arrears, as well as on about $18,000,000 First and Second Consolidateds and Convertibles, since 1874 and 1875.

The decision in question was on suit for back rental and interest on the same or *compound* interest on the First Consolidated bonds, and it said that these bondholders would be entitled to *simple* interest only, or in other words back rental, *after* the C., C. & I. C. road had complied with the terms of the lease and actually reduced the total bonded debt including the First Consolidated bonds and all underlying bonds, to $15,821,000 As the road itself cannot raise the required funds, it rests with the First Consolidated bondholders to so reduce the debt; and in doing so can buy up the sectional or original bonds issued before the consolidation under the C., C. & I. C., and cancel them, or surrender and cancel First Consolidated bonds to the amount of $1,500,000 to $2,000,000; but overdue coupons on same cannot be surrendered in lieu of the bonds, although these coupons, or in other words the back rental, would amount to nearly $3,000,000, and to enough to make the required reduction. While they cannot be thus applied, however, the holders thereof will be entitled to a decree against the Pennsylvania or Pittsburg, Cincinnati and St Louis roads for the payment of all these coupons except on bonds surrendered as above, but they will receive no interest on the overdue coupons themselves, so paid except from and after the debt is reduced to $15,821,000. In brief, the holders of these First Consolidated bonds will be entitled to recover simple interest and not compound, or the face of the overdue coupons except on $1,500,000 to $2,000,000, which must be surrendered, or about $1,000 in every $5,000 of bonds; while in return they will receive on April, 1880, $350 on each $1,000 bond not so surrendered, or $2,920,000 on $8,439,000, or one third of the face of the bond in return for one fifth, or about $2,000,000 of bonds now surrendered as per arrangement of Committee of Trustees with Union Trust Company. In the rendering of the this decision the term back rental was used because the lease required the payment to the C., C. & I. C. of 30 per cent of the gross earnings of the road, or, in case this should not be sufficient, the interest on the said $15,821,000. As this 30 per cent was not sufficient because of the discriminations against the C., C. & I. C. in favor of the Pittsburg, Ft. Wayne and Chicago road, the Pennsylvania became liable for the payment of interest on said $15,821,000: hence back rental is nothing more nor less than unpaid interest on the bonds.

Canal Towage.

The Belgian system of towage is soon to be tried on the Erie Canal. Ten steamers are nearly finished, and this week 100 miles of cable, extending from Buffalo eastward, will be in complete working order. Two wire cables, each one inch in diameter, are laid along the bottom of the canal, from lock to lock. The steam towboat has a clip-drum, or grooved driving wheel, with suitable guiding and tightening pulleys placed upon one side of the boat, above the water line. The process of towing is performed by lifting the cable from the bottom of the canal by means of a grapple and placing it over the clip drum. This drum is then put in motion (turned) by an engine in the towboat, causing the cable to pass over it without slipping, and fall back again into the canal at the stern of the towboat. The train in tow follows like a train of cars.

Inspection of Steam Vessels.

The Secretary of the Treasury has issued a circular affirming the decision of the Solicitor of the Treasury to the effect that Assistant Inspectors of steam vessels are incompetent, under the steamboat laws, to sign certificates of inspection; and they are notified that the practice of doing so, heretofore in vogue under the authority of the Department circular of April 5, 1872, must be at once discontinued. All certificates of inspection issued hereafter must be signed by the Local Inspectors, except when inspections are made by the Supervising Inspectors, when such certificates must be signed by those officers.

Advance in Pig Iron and Heavy Imports.

There has been an excited Iron market the the past week and prices have advanced $3 per ton. At the same time there have been heavy purchases of English and Scotch pig to arrive in absence of supplies. These purchases aggregate fully 100,000 tons, mostly English, within the past three months.

☞ The Baltimore Journal of Commerce publishes a review of the grain trade of that port for the year ending August 31. The receipts for the year are set down at 52,588,380 bushels, and the exports at 46,210,652 bushels. This is a gain o 15,000,000 bushels upon the business done in the previous year.

RAILROAD SHARE LIST, including Mileage, Rolling Stock, Debts, Income, Dividends, &c., &c.

An asterisk (*) occurring in the column headed "Rolling Stock" signifies that the cost thereof is included, in that headed "Railroad." A *dash* (—) across the column signifies "nil," and running *dots* (.....) signify "not ascertained." Land Grant Railroads are printed in "*Italics*." State-aid Railroads are distinguished by a "¶."

Wealth Easily Obtained.

Jay Gould, combining vast amounts of money with several great capitalists, has frequently made colossal profits in stock speculations, paying millions to each shareholder. The new combination plan of Messrs. Lawrence & Co. confers similar benefits on the shareholders who invest small and large amounts, from $25 to $10,000. The money of thousands of customers is thus massed in one mighty sum, and operated with the ripest experience and best skill, has secured the most brilliant successes. A hotel keeper in Ohio invested $100 in a combination, which netted $478. Three reinvestments resulted in a total profit of $13,801 18. A Boston gentleman invested $500 in a combination, which yielded a profit of $2,817 04; two reinvestments netted him $8,644 81. A Chicago merchant made $43,210 41 in four months of combination investments. New explanatory circular with "rules for unerring success." Apply to Messrs. Lawrence & Co., Bankers, 57 Exchange Place, New York City.

The foregoing is a correct statement of the public debt, as appears from the books and Treasurer's returns in the Department at the close of business, August 30, 1879.

JOHN SHERMAN,
Secretary of the Treasury.

Total issues of 4 per cent Loan.....	$740,795,300 00
Amount not disposed of.....	726,700 00
Total amount authorized	$741,522,000 00

☞ A Winnipeg, Manitoba dispatch says that Acting Chief Engineer Smelloe and Contractor Ryan have returned from a preliminary inspection as far as Portage la Prairie of the proposed route of the Canada Pacific Railway, 100 miles west from Winnipeg. It is understood that orders have arrived from Ottawa to commence work immediately.

☞ Mr. John L. Caldwell, having resigned the Superintendency of the Delaware and Chesapeake Railway, Mr. O. S. Sanford, of Boston, has taken charge of the road as Superintendent, by order of the executive committee.

☞ William A. Whiteley having resigned his position as Receiver of the Springfield, Jackson and Pomeroy Railroad, to be sold by the Sheriff October 1, William Thornbury, the present Superintendent, was appointed in his stead.

☞ Samuel R. Reed, of Joliet, Ills., has been appointed Receiver of the Chicago, Pekin and Southwestern Railroad vice F. E. Hinckley, removed.

American Railroad Journal.

Saturday, September 20, 1879.

Financial and Commercial Affairs.

Cable advices have been generally of increasing activity and firmness in the financial lines, a continued though slow improvement in commercial affairs, and of hardening markets for American produce. In the various domestic business connections, the reports of the week are of a very favorable tenor, and the outlook is viewed with unusual confidence. The crop movements are on a very liberal scale, and are yet drawing hence important amounts of currency, which circumstances exert considerable influence on the course of Money here, where an active inquiry is noted from all sources for accommodation, enabling lenders to maintain rates very well through the week. The quotations to responsible Stock Exchange borrowers toward the close were from 4@7 generally 5@7 per cent, and to the dealers in the public funds at 3@5 per cent per annum, while the best class of mercantile credits were rated at 6@7 per cent per annum. On this basis, the wants of the principal borrowers have been readily met. The U. S. Sub-Treasury coin reserve is now up to $141,171,824, while the currency balance is down to $30,799,866. The City Banks, in their latest weekly exhibit, indicated a further reduction in the loan and discount average of $426,400, with an increase in the item of circulation of $231,200. The average of deposits was further diminished $1,062,700. The lega tender reserve was also cut down $607,800, and the specie average augmented $123,100. The City bank net reserve of specie and legal tender

notes now shows an excess over the legal requirement of reserve to liabilities of $2,964,775, or a loss for the week of $219,025. The City bank exchanges in currency reached $507 109,349, or a daily average of $84,518,228. Under official instructions, preparations are now in progress, for the redemption in gold of legal tender notes at all the Sub-Treasury offices of the country.

A livelier business has been reported in the favorite issues of Government Securities, mainly on investment account, leading to an improvement in prices, closing firmly, on comparatively moderate offerings. At the close on Wednesday the current quotations were as follows:

United States currency 6s, 121¾ to 123½@—; do. 6s, 1880, registered, 103¾@104; do. coupon, 103¾@103⅞; 6s, 1881, registered, 104¾@105; do. coupon, 104¾@104⅞; 5 per cents, 1881, registered, 102⅛@102⅝; do. coupon 102⅛@102⅝; 4½ per cents, 1891, registered, 104⅝@104¾; do. coupon, 104¾@104⅞; 4 per cents, 1907, reg., 101@101⅛; do. coupon, 102@102⅛.

The amount of United States bonds deposited with the U. S. Treasurer at Washington for circulation during the week was $1,850,300. And of United States bonds held for circulation withdrawn during the week $953,000. The Treasury Department now holds $356,121,650 in United States bonds to secure the outstanding national bank circulation. The National bank circulation is now $330,730,047 of currency notes and $1,448,840 of national gold bank notes. National Bank notes received at the Treasury Department last week for redemption were to the amount of $780,000.

In the favorites of the State Loans business has been more active on a stronger market value, closing generally higher, though irregular. Railway Mortgages have been more freely dealt in, especially the more substantial loans which have been offered less freely, and have been, in most instances, advanced; closing buoyantly. In the line of Railway and Miscellaneous share property the transactions have been unusually extensive, and the drift of the speculation has been decidedly bullish, though the Monetary influences have had more or less serious weight in disturbing prices also adversely affected by realizing sales, especially on the fancy list. The general market left off higher than at the date of our last. The very satisfactory progress of the commercial revival has tended to strengthen confidence in the future course of values. The dealings as officially reported, which on Wednesday of last week were about 204,000 shares, and on Thursday 156,000 shares, reached on Friday 187,000 shares, receding on Saturday to 143,000 shares, rising again on Monday of the current week to about 306,000 shares, followed on Tuesday by an aggregate of 277,000 shares. The encouraging prospect for an unusually liberal export trade in Produce is viewed as likely to be of much benefit to the railroad carrying interest.

Through the restricted offerings, and more urgent call (as resulting from the adjustment of the specie importations) Foreign Exchange has been quoted higher, closing buoyantly. Bankers' sixty day bills on London closed at $4 81½@$4 82½; sight bills on London at $4 83½@$4 84½ to the £ sterling. Cable transfers, $4 84@$4 85. The specie outflow last week was only $77,700, making the total exports of specie hence since January 1, 1879, $12,277,641, against $10,419,663 the same time in the preceding year. The imports of specie at this port last week reached the extraordinarly large aggregate of $10,003,846 making the total since January 1, 1879, $26,060,584 against $15,076,463 same time in the preceding year. Of the imports last week were: in Foreign gold coin $4,982,260; American gold coin, $2,176,879; Gold bars, $2,194,635; Foreign silver, $94,654; and American silver, quarters and halves $63,342; with the small sums, in various forms. On Tuesday of the current week, further imports of specie were reported to the amount of $3,980,000. The Customs drain for gold in the local market reached $2,334,560 or an average of about $555,760 per day. The week's imports of Dry Goods and general merchandise were to the specie value of $7,179,688 (of which $2,597,924 of Dry Goods), as against $5,410,240 the corresponding week of 1878. The week's exports of Domestic Produce and Miscellaneous Goods from this port were to the aggregate value of $7,627,576 against $7,799,540 same week 1878, making the total exports of produce since January 1 this year $234,880,481, against $246,836,294 same period of 1878.

As already indicated, the business of the Fall season is quite brisk in most lines, and gives very encouraging promise in nearly all connections. Produce and Merchandise generally have been of very ready sale on a very well supported basis as to values, outside the staple products, which are more or less decidedly affected by speculative influences. Breadstuffs have been unusually active, and the tendency of prices in most instances has been upward. Wheat and Corn have been very brisk, due largely to speculative manipulation here and at the West, which led to a further sharp rise, though fluctuations have been frequent, in the instance of Wheat notably so, closing, however, more steadily. Rye has also been advanced materially. Flour has been likewise quoted higher and quite active in good part on export account, closing firmly, on quite moderate offerings of favorite brands. The Foreign advices have been more favorable to the export movement. The week's exports clearances hence of Breadstuffs for European ports included 60,000 bbls. Flour, 2,144,000 bushels Wheat, 1,016,000 bushels Corn, and 142,300 bushels Rye and 74,317 bushels Oats. Provisons have been fairly active, and as a rule stronger though irregular in price; hog products leaving off in favor of buyers. Butter and Cheese much higher. Naval Stores and Petroleum have been in more demand, closing at an advance. Tobacco has been moderately active. Wool has been of ready sale at full prices. Dry Goods continue brisk and firm. Hardware active. Boots and Shoes have been freely taken at full prices.

Cotton has declined sharply, on only a moderately active business, even in the way of options closing weak. Early deliveries have been depressed. Low Middlings closed for prompt delivery at 11⅞@12; Middlings at 12 3-16@12 5 16. Options left off for September basis of Middling at 11.99@12.00; October at 10.63@10.64; November at 10.28; December at 10.24; January at 10.29@10.31; February, 10.42@10.44; March, 10.54@10.56 April, 10.69@10.71; May, 10.80@10.81. The crop movement thus far since Sept. 1st gives receipts of 78,302 bales, against 108,890 bales same time in the preceding year. Exports from all the shipping ports since Sept. 1, 14,205 bales to Great Britain and 650 bales to the Continent, against 8,276 bales to Great Britain and 250 bales to the Continent same time in the preceding cotton year.

Metals have been actively sought after at rising prices. Manufacturers are unable to accept further important contracts for their product of Iron and Rails, for anything like early delivery. Of the more important transactions of the week were further sales of 4,000 to 5,000 tons Steel Rails, on p. t.; 9 000 tons old Iron Rails, part resales, at $26@$28. 18,000 tons American Pig (of various brands, part at $23@$25 for No. 1); and about 2,200 tons Scotch Pig at stronger figures part ranging from $22@$24.

More animation has been reported in the line of Ocean freights at generally firmer rates closing as a rule, in favor of shipowners. Grain room on berth for Liverpool closed at 7½d. by steam, and 6@7d. by sail; for London, at 8d. by steam. Provisions by steam for British ports at 27s. 6d.@42s. 6d. Grain tonnage, of average carrying capacity, for Cork and orders, at 6s. and proportionately for the Continental ports. Through freights have been quite active, especially in the lines of Breadstuffs and Provisions, on the basis of the recently revised schedule.

The following quotations of sales of Railway and other securities are in addition to those given elsewhere in our columns:—

Consolidation of Gould's Trans-Continental Lines.

During the past week an important meeting of railroad managers was held at Chicago on the arrival in that city of Mr. Gould, for the purpose of completing the consolidation of the lines lately coming under his control as links in his long dreamed of Trans-Continental route from the Pacific to the Atlantic Oceans. Included in this consolidation were the Wabash, the St. Louis, Kansas City and Northern, and the Kansas City, St. Joseph and Council Bluffs roads, to take effect October 15th, 1879, subject to approval by the stockholders thereof. With the Union and Kansas Pacifics already in his control, the Erie is now the only missing link in the realization of Mr. Gould's long cherished dream.

☞ At the annual election for directors of the Indiana, Bloomington and Western Railway Company, held at Indianapolis on the 10th inst., the following gentlemen were chosen: Austin Corbin, E. W. Bond, Gilbert Oakley, J. L. Devon, A. Sully, Giles E. Taintor, John P. Adriance and C. R. Williams of New York; James N. Campbell of Davenport, Iowa; R. E. Williams of Bloomington, Ills.; George W. Gill of Worcester, Mass.; John L. Farwell and R. K. Dow of Claremont, N. H. The board elected Austin Corbin President; Giles E. Taintor Vice President; A. Sully Secretary.

☞ The Happy Hollow Railroad Company, termini Rachtel station, on Snow Fork branch of Columbus and Hocking Valley Railroad in Athens county, and the town of Doanville, all in Athens county, capital stock $20,000, by John F. Welch and others, have filed a certificate of incorporation with the Secretary of State of Ohio.

☞ The net earnings of the Ogdensburg and Lake Champlain Railroad for four months to August 1 were $24,656 81.

Spiegel.

Attention has been directed to the large increase in the importations of pig during the past eight months as compared with the same period in the three preceding years. This is generally attributed to the improvement that has recently taken place in the iron market of this country, combined with the depressed condition of the foreign iron trade. Investigation, however, develops the fact that a very large majority of the importations are not in reality pig iron but spiegeleisen, a prime factor in the production of Bessemer steel, the demand for which is rapidly increasing, owing to the active demand for steel rails. Such is the demand for those goods that every Bessemer converter and steel rail mill in the United States is run night and day, yet they are unable to keep up with their orders. Spiegeleisen is made from a manganiferous iron ore—a grade very scarce in this country, or at least, no considerable beds have been developed, hence Bessemer steel markets find it necessary to import the bulk of their spiegel from Europe. The only American establishments that produced any considerable part of their own spiegel are the Cambria Iron works, at Johnstown, Pennsylvania, those of Cooper, Hewitt & Co., in New Jersey, and one or two establishments in Tennessee and Alabama. A gentleman who had made a survey of Montana, states that there are large beds of manganiferous iron ores in that territory and eastern Oregon, on or nearly on, the present survey line of the Northern Pacific Railroad. The high price that spiegel commands would allow a long rail transportation, and yet leave a good margin for profit to the smelter. Large beds of titaniferous iron ores are also said to exist in Montana, on the line of the Northern Pacific Railroad. These are very rare, and are the most valuable iron ores known. It was from them that the steel for the famous Damascus and Toledo Blades were made.—*Pittsburg Gazette.*

Kerite.

Many Railroad Companies—especially those which use Gutta Percha insulated electric conductors—will be interested in the following extracts from a very recent decision by Judge Blatchford.

The best way to avoid liability to the patent here referred to will be to substitute for Gutta Percha Mr. A. G. Day's Kerite, which has been adopted by the Western Union Telegraph Company, by the Government and many leading Railroads.

BLATCHFORD, J. This is a motion for a preliminary injunction to restrain the infringement of Letters Patent granted to George B. Simpson, May 21st, 1867, for an "improvement in insulating submarine cables." This patent has been sustained as valid by this Court, on final hearing, in a suit brought on it by the same plaintiff against the Western Union Telegraph Company. The claim of the patent is as follows: "The combination of gutta percha and metallic wire in such form as to encase a wire or wires, or other conductors of electricity, within the non-conducting substance, gutta percha, making a 'submarine telegraph cable,' at once flexible and convenient, which may be suspended on poles in the air, submerged in water, or buried in the earth to any extent, for atmospheric and submarine telegraphic communication, and for other electric, galvanic and magnetic uses, as hereinbefore described."

In construing the specification of the patent, in the former case, the Court said, in its decision: "It is plain, from the language of this specification, that the point of the invention is to make use of the fact that gutta percha is a non-conductor of electricity, to insulate, by means of gutta percha, a metallic wire, which is a conductor of electricity, and thus prevent the escape of electricity from the metallic wire, when it is suspended in the air or submerged in water or buried in the earth, when, but for such insulation, the electricity would escape from the metallic wire. The mode of insulation described is to combine the gutta percha and the metallic wire in such manner that the wire will be covered on all sides with a uniform coating of gutta percha."

An extract from a work in German, called Dingler's Polytechnic Journal, was put in evidence in the former case. A translation of the material parts of it was as follows: "Insulation of the wires of electric telegraphs. The public papers announce, that the experiments which the Prussian Government is having tried at present, in respect to the most serviceable mode of constructing electric telegraphs, are turning out very favorably for the laying of the wires under ground in coatings of gutta percha, so that probably all public telegraphs will be laid in this manner. * * * If the insulation of the wires under ground, discovered by Lieutenant Siemens, keeps good, all important towns can be easily connected with the capital." In regard to this extract, the Court said, in its decision: "The publication in Dingler's Polytechnic Journal of 1848, gives an account merely of experiments then in progress, and not of a completed invention, even if the part of it in question was published prior to Simpson's invention, and it does not set forth the insulating or non-conducting property of gutta percha for use with a telegraphic wire under water." The defendant now introduces in evidence a publication in German, which was not in the former case, namely, the Bremen Gazette of Sunday, December 19th, 1877.

It is very manifest, that the article in the Bremen Gazette conveys no more information than the article in Dingler's Journal, so that this defence was passed upon in the former case. Neither of them describes, or would enable any person to construct, a telegraph cable, consisting of a telegraph wire, covered, as Simpson's specifications states, "on all sides, with a uniform coating of gutta percha," such cable being "flexible and convenient," and capable of being "suspended on poles in the air, submerged in water, or buried in the earth." All this is embraced within the definition of the invention and the construction of the claim given in the former case. There must not only be insulation by means of gutta percha, but insulation "by the means specified" and "in the manner described." The extent of the article in the Bremen Gazette, is that the wires are laid "under ground in coatings of gutta percha" and thus insulated. How the coatings of gutta percha are applied, or what their extent is, is not stated, nor is it said that the wire is covered on all sides with the coating, or that the covered wire is flexible or is capable of being suspended on poles in the air or submerged in water. The affidavit of the defendant's expert, Mr. Renwick, does not advert to these considerations, nor does that of Mr. Griffin, nor that of Mr. Pope, nor that of Professor Doremus.

The foregoing observations apply, also, to the Rutter patent of December 23d, 1847, except that the wire cords of Rutter were flexible. As pointed out by Mr. Burrill, in his affidavit, the Rutter pattern does not describe or suggest the insulating or non conducting property of gutta percha for use with a telegraph wire under water, nor does it describe a wire completely covered with a uniform coating of gutta percha and adapted for use as a submarine telegraph cable or even as a subterranean cable. Mr. Burrill comments on the language of the Rutter specification, and says: "In my view, the specification of Rutter, so far as it relates to the use of gutta percha, is too meagre and insufficient to convey any practical information in regard to insulating and covering a wire with gutta percha for any purpose, and contains no hint of the use of gutta percha as a submarine or subterranean cable insulator." Professor Morton, in his affidavit, examines the specification of the Rutter patent, and states that, in his opinion, it conveys even less information than the extracts from Dingler's Journal and the Bremen Gazette. He also says: "It is impossible to gather from the slight mention made, in this specification, of the uses of gutta percha, what the patentee understood of its uses or capacities, and I am by no means convinced by the specification that the patentee supposed that gutta percha was itself an insulating material. However that may be, the patent does not describe the invention described and claimed in the Simpson patent of a wire adapted for submarine insulation by being incased in a complete and uniform coating of gutta percha.

The affidavits of the experts for the defendant, and the argument of its counsel, are largely founded on the erroneous view, that Simpson's patent is invalid if he was not the first discoverer of the insulating property of gutta percha. It is true, that, in the former case, it was held, on the evidence, that Simpson was the first discoverer of the insulating property of gutta percha, being prior to Faraday, and the publication in the Dingler's Journal not being an account of a completed invention. But, as before stated, the claim of the patent is not for that discovery, but is for the means and manner by which that discovery is made use of, to construct such a cable as the specification describes, for such use as is specified.

Undoubtedly, if the structure of Simpson, as described and claimed by him, were described in a publication, or patented, of a date earlier than Simpson's invention, but stated to be made for underground or aerial use, and not stated to be made for submarine use, it could not be subsequently patented for submarine use. But, as Simpson was the first inventor of such structure, he has the right, under his patent, to the exclusive use of it for all telegraphic or electric uses to which it is adapted.

All the views presented on the part of the defendant are covered by the foregoing considerations and by those set forth in the decision in the former case. It results, that nothing is shown to destroy the force of the decision, or to throw such doubt upon its correctness as to deprive it of the usual weight to be accorded to such a decision on a subsequent application for a preliminary injunction.

More than a Mile a Minute.

There has recently been a controversy among railroad engineers as to the speed of trains, some contending that it was impossible to go at the rate of a mile a minute. Recently a test was made on the fast train of the Pennsylvania railroad between Philadelphia and New York, which makes no stop for a distance of 80 miles, between Germantown Junction and Jersey City. Five miles were passed over in exactly 4 minutes and 55¼ seconds. At another point three miles were made in 2 minutes and 36 seconds. No extra speed was made on this train, which consisted of four cars, containing 163 passengers. The engineers of the Pennsylvania railroad assert that there are a dozen trains a day that make a mile a minute on every trip,

☞ The Harlan & Hollingsworth Company, of Wilmington, Del., has contracted to build a first class iron passenger steamboat for the Albany day line, for use on the Hudson river. The boat is to be 300 feet in length over all, 285 feet at the water line, 40 feet beam and 11½ feet depth of hold, and to draw 5 feet of water.

☞ A corps of engineers is surveying a route for a line of railroad from Shamokin to Sullivan county, which is proposed as a shorter route to the Northern lakes from the Southern coal fields

☞ A by law granting a bonus of $60,000 in aid of the Waterloo, Wellington & Georgian Bay Railway was carried in Woolwich township, Waterloo County, by seventeen majority.

The Coal Trade.

The total tonnage of anthracite coal from all the regions for the week ending September 6, as reported by the several carrying companies, amounted to 490,874 tons, against 163,318 tons in the corresponding week last year, an increase of 327,566 tons. The total amount of anthracite mined for the year is 17,123,275 tons, against 10,522,232 for the same period last year, an increase of 6,601,043 tons. The quantity of bituminous coal sent to market for the week amounted to 38,281 tons, against 81,957 tons in corresponding week last year, an increase of 48,676 tons. The total amount of bituminous mined for the year is 2,372,568 tons, against 2,216,495 tons for corresponding period last year, an increase of 156,073 tons. The total tonnage of all kinds of coal for the week is 529,185 tons, against 408,291 tons in corresponding week last year, an increase of 288,880 tons, and the total tonnage for the coal year is 19,495,843 tons, against 12,738,727 tons to same date last year, an increase of 6,757,116 tons. The quantity of coal and coke carried over the Pennsylvania Railroad for the first week of September was 119,649 tons, of which 92,862 tons were coal, and 26,787 tons coke. The total tonnage for the year thus far has been 3,694,951 tons, of which 3,068,540 tons were coal and 872,411 tons coke. These figures embrace all the coal and coke carried over the road east and west. The shipments of bituminous coal from the mines of the Cumberland coal region for the week ending September 6 were 7,371 tons, and for the year to that date 1,105,796 tons—67,491 tons more than in the corresponding period of 1878. The shipments to the Baltimore and Ohio Railroad for the week were 5,647 tons, for the year 637,921 tons, an increase of 60,248 tons, as compared with 1878. The shipments by the Chesapeake and Ohio Canal for the week were 989 tons, and for the season 353,296 tons, a decrease of 27,214 tons as compared with last year. The shipments to the Pennsylvania Railroad were for the week, 835 tons, for the year 114,579 tons, an increase of 34,456 tons as compared with 1878. The Reading Railroad Company reports a coal shipment for the week ending on Saturday evening last of 190,000 tons, of which 70,000 tons were sent to Port Richmond, and 57,000 tons were shipped thence. The receipts of coal at Perth Amboy for the week ending September 13 were 23,127 tons, and the shipments 34,263 tons, and the stock on hand at that date 133,054 tons.—*Phila. Ledger, Sept.* 15.

Quicksilver Mining Company.

News was received in this city on Tuesday that the Court of appeals had given a decision sustaining that of the court below respecting the preferred stock of the Quicksilver Mining Company. The company was organized under a special charter in this State in 1866, by Samuel T Arnold and others. The lands and mines are situated in California, and were originally owned by a Pennsylvania company. The new capital stock was $10,000,000, issued in a single certificate. There were 250 stockholders in the New York company. The enterprise did not at first prove a success, and the company became greatly embarrassed. At length, in 1870, as a desperate resort, a proposition was made to the stockholders to pay $5 on each share of their stock, which would then become preferred. At a meeting held Feb. 24 of that year the by-laws were amended and resolutions were adopted authorizing the issue of preferred stock in accordance with this plan, and many stockholders availed themselves of the privilege. The money thus obtained tided the company over its difficulties, and four years later the stock began to be dealt in publicly. It attracted the attention of prominent speculators, notably Daniel Drew, and these parties, having obtained a controlling interest in the common shares, made an attempt in board meeting to pass a resolution wiping out the preferred stock. Mr. George L. Kent, who held 2,500 shares, and other large stockholders, obtained an injunction preventing them from carrying out their purpose, and subsequently brought suit to compel the company to recognize and settle the claims of the preferred stockholders The case was tried before Judge Barnard in Poughkeepsie, and was bitterly defended, ground being taken that the company had no power to amend its by-laws and issue preferred stock. On Aug. 28, 1878, Judge Barnard rendered a decision in favor of the preferred stockholders. Among other things, he said :

The contract of preference authorized by the amended by-laws and resolutions adopted on Feb. 24, 1870, was within the corporate powers of the Quicksilver Mining Company, and the adoption of the said by-laws and resolutions was a proper and legitimate exercise of the powers of the company under its charter. The contract of preference is presumably valid, and not having been objected to within a reasonable time and in a proper manner by any stockholder, is binding upon the company and its stockholders in favor of the plaintiff and all holders of such preferred stock. The stockholders of the Quicksilver Mining Company, by acquiescing in the action of the company in making such contract of preference and appropriating the moneys realized therefrom, have assented to and ratified said contract, and the same is binding upon them by reason of such assent and ratification.

This was practically the view taken of it by the Court of Appeals. When the news reached Wall street Quicksilver preferred stock rose 6¾ per cent, from 46½ to 53¼, and the common declined 1 per cent. Subsequently a second report was circulated to the effect that the Judge had tacked on to their affirmation a decree sending the question of an equitable adjustment between the common and preferred stockholders to a Referee for determination. This was false, but it sent the preferred stock down again 6¾ per cent, and advanced the common 2 per cent. The former afterward rallied 3½ per cent, to 50, and then reacted 1½ per cent to 48½. The following is an abstract of the opinion written by Judge Folger :

All the powers of the company are to be got from its charter or the general provisions of the Revised Statutes. Doubtless it had power to borrow money ; but a borrowing of money implies a time when payment may be made or may be demanded. As there was no such time here, the act of the company was not a borrowing of money. It was nothing else than the creation of a preferred stock. The court is not prepared to say but that when the company first started it might have classified its capital stock into preferred and common, and it may be that legislative authority, or unanimous consent of stockholders, would give the right afterward ; but this company did otherwise without that authority of consent. It violated, by the act of creating preferred stock, its contract with the non-assenting stockholders, and thereby disturbed a vested right. The court, therefore, holds that the act in itself could not have been upheld but for the consideration that the non-assenting stockholders had, by their silence and neglect to promptly ask for judicial interference, acquiesced in the action of the company, and are thereby estopped from now seeking that interference as against the parties now holding the preferred stock.

Other incidental topics are noticed in the opinion, such as the alleged unstable nature of the transaction, and whether the contract was executed or executory. The opinion is elaborate and fully discusses all the questions involved.

☞ John King, Jr., vice president of the Baltimore and Ohio Railroad Co., designs taking up his residence at Cincinnati about the 1st of October as the general manager of all traffic of the Baltimore and Ohio system.

Railroad across the Isthmus of Tehauntepec.

Recent advices from Mexico announce that work has been begun on a new railway across the Isthmus of Tehauntepec, starting from the mouth of the Coatzacoalcos river, 110 miles southeast from Vera Cruz, and extending to the inland lake on the Pacific Coast called the Upper Lagoon. The length of the main line will be nearly 150 miles. The grant for the road was made by the Government of Mexico in June last to Edward Learned, of Pittsfield, Mass. The right of way is 229 feet along the entire route, and the Government gives the company such a strip of unoccupied public lands as may be required for the line of the road, and in addition one half of the unoccupied public lands that may be found within one league from each side of the railroad.

To aid in the construction of these improvements the Government, in addition to other stipulations, binds itself to give to the company a subsidy of $12,070 50 for each mile of railroad built, and agrees not to grant a subsidy to any other enterprise of a similar character on the same line for a period of twenty years, although the right is reserved to authorize the construction of a canal.

Mr. Learned, the grantee, said that work was already in progress, and that large purchases of rails and material to be used in the improvement had been made. Such of the work as can be conveniently done in this country will be executed here, in order to avoid the expense of more costly labor in Mexico. He claims that the cost of the entire work will not exceed $5,500,000, which estimate he believed to be considerably in excess of the actual amount necessary to open the road, well supplied with the requisite appliances for the performance of its business.

☞ At a meeting of the Sub-Committee on Railroad Investigation at Albany on the 12th inst. Mr. Uri Gilbert, President of the Troy Car Works, testified that the price of a box freight car was $400 to $450, a milk car $100 more, and a baggage car $2,000 to $2,200. He had made drawing room cars for $8,000, but usually got $12,000; got $13,600 for sleepers. A mail car costs from $2,000 to $3,000, a passenger coach from $4,200 to $5,400 and small coal cars $200.

☞ A party of fifteen, under Colonel Talcott, Chief Engineer of the Astoria and Winnemucca Railroad Company, left Astoria on the 3d inst. fully equipped, for the purpose of surveying the proposed line of road. The most practicable starting point from Astoria is supposed to be through Lewis and Clark canyon, and a steamer has been chartered to convey the party to the head of navigation on that river. This is considered a practical commencement of the work.

☞ The new passenger cars of the Pennsylvania Railroad Company have each a small retiring room in which is a sofa, stationary washstand, etc., which enables a traveler who has not the means or inclination to travel in a Pullman coach, to make his toilet before leaving the train, which is often a great convenience.

☞ The first train on the railroad from Norfolk, Va., to Ocean View was run through on the 18th inst.

☞ The Ashland Iron Company, located at Ashland, Baltimore county, sixteen miles from Baltimore, with which Mr. Geo. Small is connected, is about to start two more furnaces to meet the demand for iron. In the past thirty days the company has sold 4,500 tons of pig iron. The works have been running one large furnace. When the three furnaces are put in operation between 400 and 500 people will be employed, and the out put of iron will be largely increased.

☞ A Milan (Italy) correspondent, referring to the Philadelphia and Reading locomotive exhibited at Paris last year, says that it has given most satisfactory and creditable results on the Roman and Alta Italia railway, burning every kind of lignite found in Italy, and, according to the report of railroad engineers who made the tests, more successfully than any other, at the same time doing better service and drawing heavier trains than the best Italian engines.

☞ A telegram from Battle Mountain to the Reno Gazette, dated September 1st, says: The grading of the Nevada Central Railroad from Battle Mountain to Austin commenced to day, and the work will be pushed to completion before 1880. The road will be a three-foot gauge, and will run up the valley of Reese river to Austin, a distance of 89 miles. It will be a first class road in all respects.

☞ The Secretary of the Interior has directed the sale of the Kansas Trust and Diminished Reserve Lands to actual settlers. The land is in the centre of the State of Kansas, and embraces about 162,000 acres. The net proceeds of the sale are to be turned over to the Commissioner of Indian affairs to be expended for the benefit of the Kansas tribe of Indians.

☞ The Denver and Rio Grande Railroad Company have issued instructions to push forward its extension from Alamosa southward to Albuquerque, in New Mexico. Five surveying parties are already selecting a route for the proposed extension into San Juan.

HAMILTON & BISHOP,
Bankers and Brokers,
NO. 19 NASSAU ST., N. Y.
DEALERS IN
Government and Investment SECURITIES.

Buy and sell on Commission, for cash or on margin, all securities dealt in at the New York Stock Exchange.

Interest allowed on Deposits, subject to draft at sight.

MINING STOCKS.

FRANK B. WHITFIELD,
(Member New York Stock and Mining Exchanges,)
No. 9 New Street, N. Y.,

Buys and sells on commission for cash, or on margin, Stocks, Bonds, and Miscellaneous Securities.

Mining Stock orders executed either in San Francisco or New York.

Correspondence in regard to Mining affairs will receive prompt attention.

DIVIDENDS CASHED. ASSESSMENTS PAID.

HENRY CLEWS & CO.,
Bankers and Dealers in
GOVERNMENT BONDS,
18 New Street.

Securities (in fractional or large quantities) bought and sold on commission; also carried as long as desired on 5 per cent. margin. U. S. Bonds purchased and sold at current market rates free of commission.

Advances made on approved collateral at market rates.

Deposits received subject to check at sight. Interest allowed on all daily balances.

Our office is next door to the N. Y. Stock Exchange, which admits of the execution of orders the instant they are received. The senior partner attends each session of the board, and gives this branch of business the advantage of his long experience and most watchful care. Our office is provided with four telegraph indicators for the use of customers, which record all transactions and quotations at the Exchange as soon as made, an important guide for buyers or sellers of Stocks, Bonds and Governments. Orders executed at the London and San Francisco Exchanges.

EWEN & OSBORNE,
BANKERS AND BROKERS,
62 Broadway and 21 New St., N. Y.
DEALERS IN
Government and Investment SECURITIES.

Buy and sell on Commission, for cash or on margin, all securities dealt in at the New York Stock Exchange.

Interest allowed on Deposits, subject to draft at sight.

WM. A. GUEST & CO.,
No. 17 Nassau Street,

New Steam Line to the Mediterranean.

A new line of steamships between America and Europe will soon be in operation. Philadelphia will be the western port, whence the steamers will make monthly departures for Barcelona, Marseilles, Genoa and Naples, and are expected to touch at Messina on the return trip. E. A. Quintard, the European agent of the Philadelphia and Reading Railroad Company, sailed in the Adriatic on the 4th inst., to make arrangements for the pioneer steamships of the new line, and was accompanied by John L. Howard, the supervising engineer of the same company. The line is be started with English steamers of about 3,500 tons burthen, but it is intended to replace them with American steamers at an early date. The outward cargoes will be of coal and other products of American industry, while the return freights will consist of the usual materials of a Mediterranean cargo for America. It is quite possible that the ships will touch at New York on their return trips. They will not—for the present, at any rate—be fitted for carrying cabin passengers, but will have ample accommodations for steerage passengers from Naples and Genoa.

☞ The Logansport, Crawfordsville and South western railroad was sold on the 10th inst. by W. P. Fischback, master in chancery, at Crawfordsville, Ind, for $315,000, to John G. Williams for the Vandalia railroad.

A GOOD PLAN

Anybody can learn to make money rapidly operating in Stocks, by the "Two Unerring Rules for Success," in Messrs. Lawrence & Co.'s new circular. The combination method, which this firm has made so successful, enables people with large or small means to reap all the benefits of largest capital and best skill. Thousands of orders, in various sums, are pooled into one vast amount and *co-operated* as a *mighty whole*, thus securing to each shareholder all the advantages of the largest operator. Immense profits are divided monthly. Any amount, from $25 to $5,000, or more, can be used successfully. N. Y. *Baptist Weekly*, September 26th, 1878, says: "By the combination system $15 would make $75, or 5 per cent; $50 pays $350, or 7 per cent; $100 makes $1,000, or 10 per cent on the stock, during the month, according to the market." *Frank Leslie's Illustrated Newspaper*, June 29th: "The Combination method of operating stocks is the most successful ever adopted." *New York Independent*, Sept. 12th: "The combination system is founded upon correct business principles, and no person need be without an income while it is kept working by Messrs. Lawrence & Co." *Brooklyn Journal*, April 29th: "Our editor made a net profit of $101 25 from $20 in one of Messrs. Lawrence & Co.'s combinations." New circular (mailed free) explains everything. Stocks and bonds wanted. Government bonds supplied. Lawrence & Co., Bankers, 57 Exchange Place, N. Y.

ALEX. FROTHINGHAM & CO., BANKERS AND Stock Brokers, No. 12 Wall st., buy and sell stocks on the New York Stock Exchange and carry the same as long as desired on a deposit of three per cent. Careful attention given to orders for investment from $25 upwards in "Puts" and "Calls," which frequently pay from ten to twenty times the amount invested. Explanatory Circular and their Weekly Financial Report sent free on application.

$10 TO $500 All wishing to make money in stocks on Wall Street should deal with the undersigned.

TO MINE OWNERS.

The New York Stock Exchange has at last opened its doors to the mining interest of our country, and now allows its members to deal in mining shares. Parties who have first class mining properties, and wish to organize companies, under the laws of the State of New York, which are liberal, and find a market, would do well to communicate with

Office 60 Broadway, N. Y.

A. G. DAY,
MANUFACTURER OF
Kerite Insulated Telegraph Wire and Cables.
FACTORY, SEYMOUR, CONN.

THE DI-ELECTRICAL PROPERTIES OF KERITE have been thoroughly tested, and its superiority over all other kinds of Insulation fully demonstrated.

ITS DURABILITY

has been demonstrated beyond question in practical use of hundreds of miles of Kerite-covered wires by the Fire Alarm and Telegraph Companies. In New York it has been largely used for the last *ten years*, under all conditions and exposures; the resistance now is as great as when first exposed.

FACTS FULLY ESTABLISHED.

Kerite is not affected by extremes of heat and cold, or by exposure to the heat or sun; endures long continued heat below 200° Fahrenheit, may be safely immersed in boiling water, is unchanged by being placed in the ground; corrosive elements in the earth do not act upon it; acids act very slowly, only to oxidise the surface; bears exposure to not strong solution of alkalies; does not suffer by injury by destructive insects of land or water, and can be stored in tropical climes without change of insulation.

PROF. MOSES G. FARMER, says: "I have used your Kerite as leading wire, more or less for four or five years. It stands abuse, changes of temperature, alternate wetting and drying better than any insulator I have trled."

EMINENT ELECTRICIANS AND PRACTICAL TELEGRAPHISTS

commend and recognize the Kerite insulation as superior to all others.

GEORGE B. PRESCOTT, Esq., Electrician of the Western Union Telegraph Company, under date of September 25, 1874, says: "In September, 1869, we placed some of your Kerite wire, unprotected by any covering whatever, in the tunnel under the river in Chicago, and have since continued its use in that exposed situation with the most gratifying results. A portion of the tunnel is very wet, and water saturated with lime constantly drips upon the wires, while in other portions they are kept alternately wet and dry, which is well known to be one of the severest tests that any insulating material of an organic nature can be subjected to; and yet after five years' exposure under the above conditions, the Kerite covering shows no signs of decay or deterioration. An insulating covering of India-rubber or gutta-percha under a like exposure, would have been destroyed in much less time."

February 1, 1877, he writes further: "This piece of Kerite wire unprotected by any covering, was in use in the tunnel under the river in Chicago, from September, 1869, until December, 1876, and shows no signs of decay or deterioration in its insulating qualities."

For Sale by all dealers in Telegraphic Materials.
